DETAILED ACTION

Obviousness Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-44 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-59 of U.S. Serial No. 10/033,333. Although the conflicting claims are not identical, they are not patentably distinct from each other because

Art Unit: 2812

the presently claimed limitations are encompassed by the limitations of Serial No. 10/033,333.

Present Claim 1 differs from Claim 1 of 10/033,333 in that present Claim 1 also requires generating drawings and instructions, instead of just instructions as required by 10/033,333 in Claim 1. It would have been obvious for one of ordinary skill in the art using a CAD/CAM as disclosed in the present Claims and the Claims of 10/033,333, that a CAD/CAM system pertains to drawings and instructions. With respect to the claims pertaining to a storage medium, the present Claims further require creating extracts from a master process model, as opposed to the storage medium claims of 10/033,333. See present Claim 23 and Claim 40 of 10/033,333. It would have been obvious for one of ordinary skill in the art using a CAD/CAM as disclosed in the present Claims and the Claims of 10/033,333, that a CAD/CAM system would require creating extracts from a master process model. Therefore, a *prima facie* case of obviousness double patenting is established.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
